

EVENT WIFI

Providing WiFi for Events Has Never Been Easier

SLICE's Event WiFi Solution is designed to deliver high speed, reliable and professional WiFi services for all of your events. Whether indoors or outdoors, our services are meant to deliver a consistent, stable wireless connection in areas where 3G and 4G coverage can be undependable at best.

Deploying WiFi for events is a notoriously difficult task, but not with SLICE. Our event WiFi services are turn-key and cover all aspects of temporary enterprise level wireless installations. Some key benefits of using SLICE for your next event:

-  **Tiered Access** - Deliver internet access to different tiers of users and manipulate the internet experience for each.
-  **On-Site Technical Support** - We offer several levels of on-site support, ranging from network engineers to on-site helpdesk.
-  **Remote Support** - We're always keeping an eye on your network from our Midtown headquarters. If we notice any lapse in service, we can be at your event location within 30 minutes.
-  **Enterprise Level Equipment** - We only use the best of the best. Our equipment is meant for densely populated environments and can support several thousand concurrent connections with ease.
-  **Full Customization** - The SLICE Gateway allows you to fully customize your event WiFi network, giving you the ability to create a different experience for every level of user on your network.
-  **Content & Packet Filtering** - Filter out undesirable sites and applications in order to maintain the integrity of your event WiFi network.
-  **Client Isolation** - Prevent users from accessing the devices of others by isolating every device in its own unique VLAN.
-  **Marketing Over WiFi** - SLICE can be used as a powerful marketing tool simultaneously with its network related capabilities.
-  **Usage Reports and Data Collection** - The SLICE Gateway can produce hundreds of network usage & individual user reports, during and after the event.

Wireless Internet makes your event more exciting for guests, sponsors and your staff. Besides just being present, your event attendees want to engage with your brand. Whether they are streaming video, checking stats, posting comments to Facebook, or sharing photos of your event on Instagram or Twitter, their activities rely on a dependable, high performance wireless network.

The demand for consistent wireless connectivity is real but often times, event venues are not set up to support networks which require hundreds or thousands of simultaneous connections. Regardless of whether the event venue lacks the hardware, bandwidth, technical know-how or wireless capabilities altogether, SLICE Managed Solutions and our patented event kit can create an enterprise grade wireless network in just a few hours.

-  **Enterprise grade 802.11n access points capable of support over 100 simultaneous connections each.**
-  **Scalable to support thousands of concurrent connections.**
-  **Dual band access points, using both 2.4 and 5GHz spectrum.**
-  **Directional antenna technology, improves signal strength and coverage.**
-  **PoE and Mesh capable to reduce visible wires.**
-  **Custom SSID, splash pages and marketing over WiFi capabilities.**
-  **Multiple mounting options.**

The real benefit is working with a company known as the best at what it does. SLICE Managed Solutions has seen it all. Whether your event is indoor, outdoor, or hosts hundreds or even thousands of users, SLICE Managed Solutions can handle it. We have the talent and tools required to build and support wireless networks of all types and sizes.

SLICE has provided WiFi for several leading event venues and production agencies in New York City. Our track record of success has even permeated the national spotlight with successful events in Chicago, Los Angeles and Las Vegas. SLICE is the go-to company for temporary event WiFi deployment. Don't wait until the last minute! Learn how SLICE can make your next event a success by calling our solutions line today.
